

Hall Probes

John Haggerty

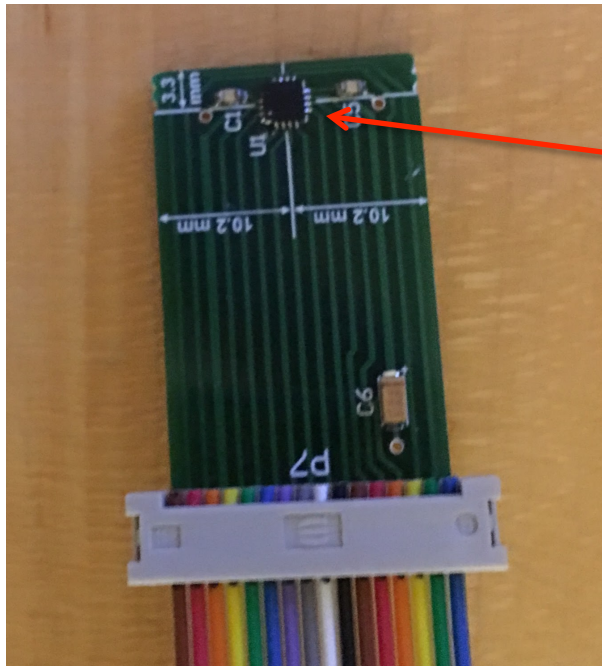

Brookhaven National Laboratory

Hall probes

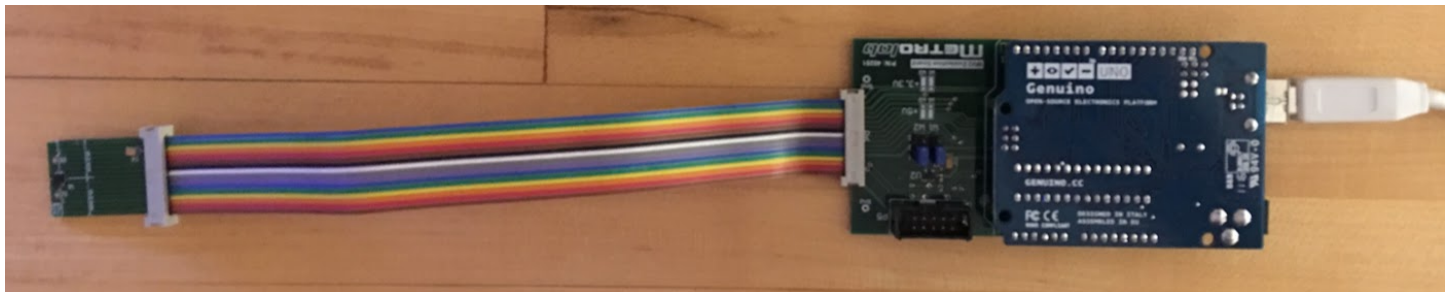

- We looked into Hall probes that can do “mapping” and monitoring in the detector without a long period of mapping with the magnet on and the TPC not installed
- Bought the Magvector MV2 3D Hall probe because it looked easy to use for the full field test
- Other probes possible (SENIS, for example)

MV2 trials

MV2 Hall Probe

Probe with SPI readout (Arduino)

December 21, 2016

Calibration

- Calibrated with refrigerator magnet so far (turn little magnet over and measure on 100 mT scale)
- Achim and I are going to talk to David Harder at NSLS II this afternoon about more sophisticated calibration
- 1%? 0.1%?
